

Parallax slider

This slider allows you to highlight and describe your products. Slider has 4 main parts. Title, text, button, and image. Title, text, and button are optional. If you don't want button, title or text, leave them blank.

You can also add optional alt, which is used as a help text.

☰ 1 BRAND NEW COLLECTION ✕

add title

add button title

add button link

add your text

add a image Alt

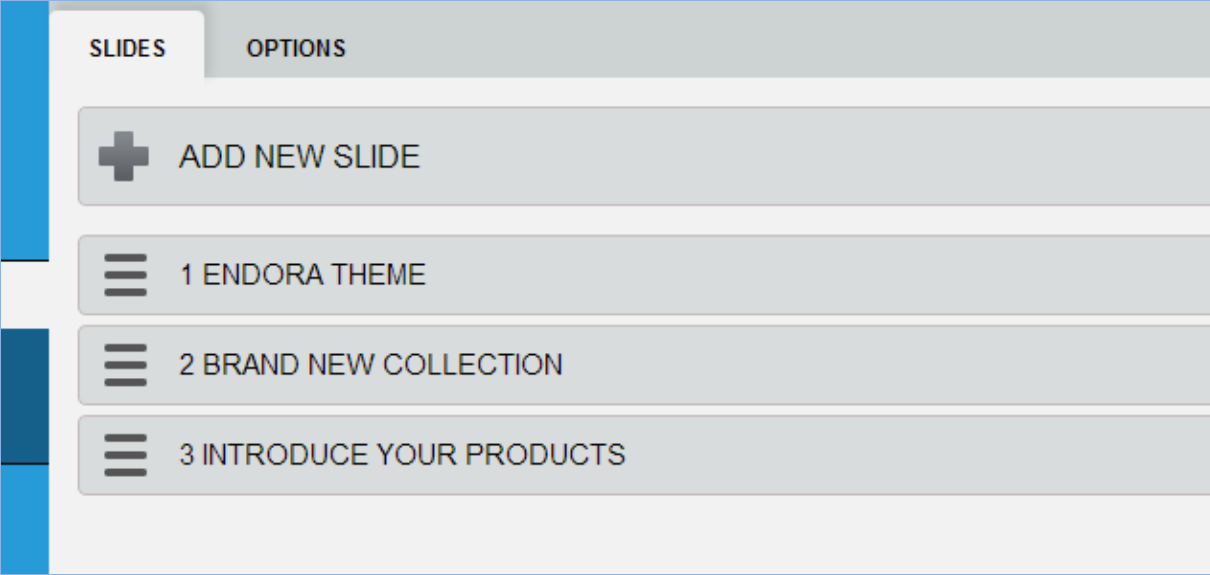

add your image

*enabled formats are .jpg and .png

Show

You can dynamically change slider order as you like with drag and drop option.

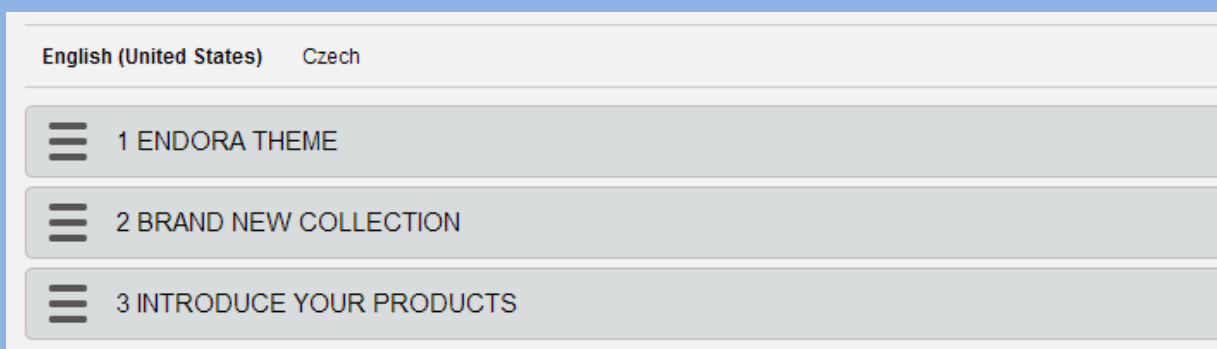

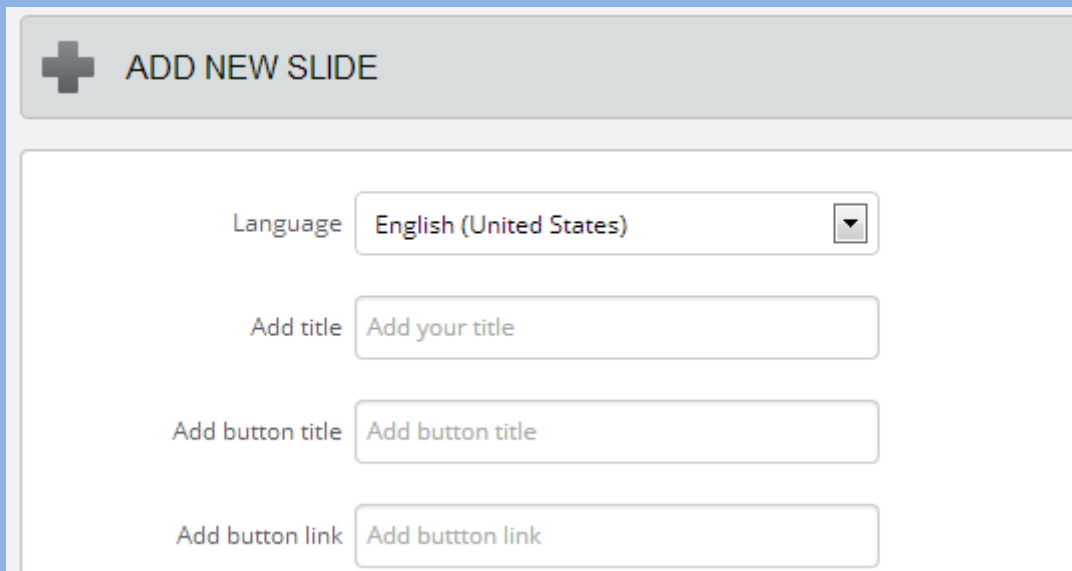

Available options

Like the promo slider and sequence slider has this slider inbuilt multilanguage support . And you can decide if you want to show different slides for every language or even you can display different slider for different languages! And how to do that? Just enable on slider option page multilanguage support.

And now you will see included multilanguage option on slider page.

So slides which you can see now are enable just for English language.

And how to set different sliders for different languages? Just do the same with other sliders. Add slides for different language. In our example add slides for Czech language.

You can see live example on [shop 4](#).

Other available options

Every slider comes with a lot of options. All options are self-explanatory and you can find them in slider option page.
