

# Promo slider

This slider is divided into two main parts

1. Main slider
2. Discounted products or own banners

## 1. Main slider

In this area you can add banners, images, and video. All images are linkable.

Note: if you want to add video, you need some cover image to hide the video, until you click on the cover image to display the video. So for example in [shop 2](#), I added this cover image.

## 2. Discounted product or own banners

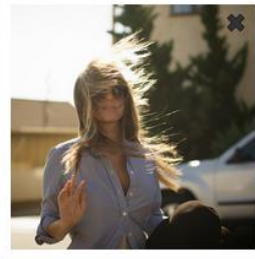

In this area you can choose whether you want to display discounted product or pick your own banners.

To do that. Go to promo slider -> option page

Promo slider with:

---

PROMO BANNERS

			
<input type="text" value="Add banner link"/>	<input type="text" value="Add banner link"/>	<input type="text" value="Add banner link"/>	<input type="text" value="Add banner link"/>
Example: <a href="http://www.google.com">http://www.google.com</a>	*Example: <a href="http://www.google.com">http://www.google.com</a>	*Example: <a href="http://www.google.com">http://www.google.com</a>	*Example: <a href="http://www.google.com">http://www.google.com</a>
<input type="button" value="add image"/>	<input type="button" value="add image"/>	<input type="button" value="add image"/>	<input type="button" value="add image"/>

## Available options

As parallax and sequence slider you can decide whether you want to enable multilanguage support.

For more informations check full docs of parallax slider.

## Other available options

Every slider comes with a lot of options. All options are self-explanatory and you can find them in slider option page.
